A elaboração do texto contou com a participação de alunos do curso. Eles digitaram, desenharam, alteraram ábacos, desenvolveram softwares, produziram modelos matemáticos, fizeram revisões, apontaram erros e omissões. Este é, sem dúvida, um produto executado a muitas mãos. O trabalho de confecção do livro foi também um instrumento poderoso na motivação para o estudo. Para desenvolver um software, o aluno precisa entender em profundidade o tema considerado. Elementos secundários do texto, que seriam examinados superficialmente, devem ser inteiramente entendidos durante

a sua revisão. À medida que o conteúdo era desenvolvido e colocado à disposição dos próprios alunos, semestre a semestre, o entendimento dos assuntos se tornava mais profundo e o rendimento das turmas nas avaliações cresceu de uma forma inequívoca. Foi uma interação que resultou em muitas vantagens diretas e colaterais
