I know many people who have said that for years they have tried to lose weight but that no matter how hard they tried, they simply could not get rid of the 'tire' around their bellies. They ate relatively healthy, they exercised and yet they simply could not shed the weight. All of them have said that since going wheat-free they have finally lost the extra weight that they had been carrying around.

**A healthier digestive system:** Wheat wreaks havoc on the digestive system, leaving you feeling bloated and gassy. The problem with wheat is that your body cannot properly break it down, leaving you feeling gaseous and uncomfortable.

**Better looks:** Not only will you lose weight, but you'll also have better looking skin, hair and nails. The reason for this is that your body will finally be rid of all the toxins and impurities that have built up over the years. Because of this your body will finally be able to work at its optimal level and the result will be a healthier inside as well as a healthier outside.
